School support project

The school support program activities are still going on, and as we mentioned previously, the project is working with nearly 130 children. They are male and female aged between 7-11 years old. During the week there are 6 teachers who teach mathematics, Arabic and English to the children in the association's headquarters.

The teachers and the parents have seen an improvement in the children's academic performance as well as their behavioral and psychological well-being.

Despite this the project is coming to an end, but more of the parents have come to register their children in the project, because of what they've heard from the parents of children who are already in the project.

And we for our part in Human Supporters Association are delighted with the good

reputation our activities have, and for the community's confidence in our programs, and we hope to continue in this giving as it brings a smile to the faces of the children and it builds the confidence of everyone involved.
