November Newsletter  
2012

**Human Rights Theatre Project**

During November the participants of the H RTP finalized their performances. A final ceremony was organized for children to celebrate the conclusion of the project and the success of their performances. A short movie was organized by staff members and was displayed, in addition to other entertaining activities. The movie summarized the stages the participants went through and showed parts of their performances.

**Artistic Workshops in Partnership with “Young Artists Forum (YAF)”**

The sessions implemented during November aimed at providing the young artists with a platform to express themselves. The goal was to help them overcome their shyness and problems with exposure in front of others, improve their abilities, and encourage them to develop their artistic skills more.

**HSA’s Football Team**

After completing an English course for the team members in October, the team participated in local competitions and won first place. In addition, they continued their regular training schedule in preparation for other competitions against other local and national teams.

**Mental health workshops for women**

In partnership with PWWSD (Palestinian working women society for development), HSA organized and implemented workshops twice monthly for women between ages of 25-45. The workshops included various activities to increase awareness of mental health problems, which allowed all the participating women to express themselves and talk freely about their daily life issues.
